Projects

Accounting Software POS System

- Developed a desktop POS and inventory management application for small retail businesses using Java, JavaFX, Spring Boot, and MySQL.
- Implemented user authentication, inventory management, checkout processing, barcode scanning, sales history, and end-of-day reporting.
- Designed a relational MySQL database to securely manage products, users, and sales transactions.
- Built an intuitive interface that streamlined daily sales and inventory tracking.

Professional Experience

Microsoft Tech academy - Academy Scholar Los Angeles, CA| **Aug 2023 – Dec 2023**

- Configured AWS services including EC2, IAM, and VPC while implementing cloud security best practices.
- Gained hands-on experience with Windows Server, Active Directory, networking, and cybersecurity through lab environments.
- Collaborated on team projects to design and present cloud-based solutions for simulated business scenarios

Heavenly Beauty Supply - Store IT Specialist Los Angeles, CA | **Dec 2023 - Mar 2024**

- Managed store IT operations, proactively maintaining both software and hardware to support business continuity.
- Resolved onsite technical problems, collaborating with technology vendors to minimize downtime and accelerate upgrades.
- Established and upheld secure user access controls and regular backup processes, supporting data security best practices.
